ERRATA: Volumes 50 and 51

S. L. Spahr, Volume 50: 847. Page 848, Column 2, Paragraph 3 should read: A blend price of $5.63 per hundred kilograms for milk containing 0.0% milk fat with a 15.4¢ differential for each – – –. A blend price more typical of milk prices paid dairymen in the Chicago, Illinois, milk market in recent years, $3.43 per hundred kilograms for milk containing 0.0% milk fat with a 15.4¢ differential – – –. Page 854, Column 2, Paragraph 1 should read: This effect is due to a 77.2¢ per – – –. Fig. 1 the blend prices should be $11.02, 9.92, 8.82, and 7.72 for A, B, C, and D, respectively. The differential should be 15.4¢. Fig. 2 the milk fat differentials should be 11.0, 13.2, and 15.4¢ for A, B, and C, respectively. The blend price should be $11.02. Fig. 3 and 4 the blend price should be 11.02, and the milk fat differential should be 15.4¢. Tables 1-4, Footnote * should be: Log income = log ($3.43 + 1.54 fat %) + log (milk).
